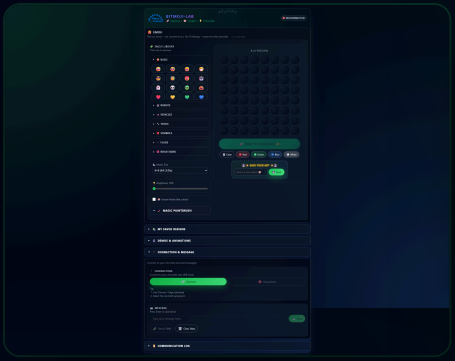
BITMOJI-LAB

micro:bit V2

Paint emojis.
Light the NeoPixel matrix.

The browser IS the pixel-art studio.

Classroom pixel-art studio. Plug a USB cable. Paint on LEDs.



Get started in 60 seconds

1. Wire NeoPixels (8×8 or 16×16) to P0 / 3V / GND.
2. Plug the micro:bit into the laptop by USB.
3. Open Chrome or Edge — no install.
4. Click Connect, pick the serial port.
5. Paint. The matrix lights up.

100+ emojis built in

Seven categories, one click to send. Or draw your own pixel art on an 8×8 or 16×16 NeoPixel grid.

Magic Paintbrush

Eight colors, brightness slider, Shift+drag to erase. Save designs locally — no cloud, no account.

11 animated demos

Heart-pulse, rainbow sweep, fire, sparkle, and eight more. Stress-test the matrix with a communication log.
