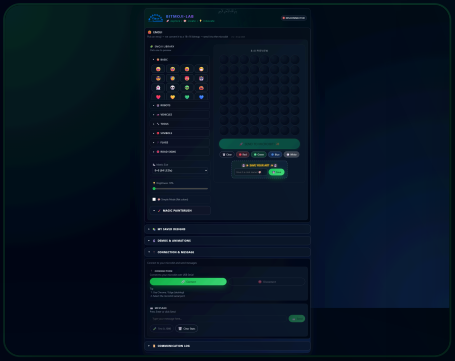
BITMOJI-LAB

micro:bit V2

Every sensor.
Live in every browser.

The browser IS the IDE.

Classroom-ready control panel. 30 laptops. Zero install.



Get started in 60 seconds

1. Plug in the micro:bit (USB or battery).
2. Open Chrome or Edge on any laptop.
3. Visit the URL below — no install.
4. Click Connect, pick your board.
5. Dot goes green. You're live.

Live sensors

Temperature, sound, light, brightness, matrix size — all streaming in real time.

Full control

Paint LEDs, paint pixels, drive motors. Record CSV sessions for lessons.

Live 3D mirror

A photoreal board tilts with your micro:bit. Kids see the physics click.

Scan to try the live demo

abourdim.github.io/bitmoji-lab

For teachers, kids, and makers.

Every scientist started by asking "what happens if I press this?"
